PROTECTION

WINTERSPORT

BIKESPORT

EQUESTRIAN SPORT

MOTORCYCLING

PIONEER

For more than 20 years we have been developing protectors for the world's leading motorcycle brands. Through the close cooperation with our customers we have gained invaluable know-how on how to best protect our customers. Like no other brand we have influenced the market for modern protection but we always stayed true to our mission to develop and improve our protectors to make them safer and easier to wear.

TRENDSETTER

We are the only brand to develop and manufacture not only the garment but the protector itself. This unique know-how allows us to develop the protector and garment as one cohesive unit. This makes our protectors much better to wear without sacrificing their protective properties. Today we are able to integrate our protectors into the lightest garments and still provide the best protection on the market.

AWARD WINNER

No other brand has won as many awards in so many different fields as we did. More than 30 awards for our motorcycling, wintersports, bike and equestrian protectors give proof to our claim to provide the best possible protection on the market.

NEW! CROSS FLEX PROTECTION 30% LIGHTER AND EXTREMELY FLEXIBLE!

- ★ We offer an overall protection area for the spine. Our protectors offer solide residual force values in warm temperatures and in cold conditions our protectors retain their flexibility. Moisture and wet conditions do not influence the protection function.
- ★ The Cross Protector expansion foam has the biggest potential to absorb the residual energy.

COMPLETE PROTECTION
from the neck to the tailbone

MAXIMUM BREATHABILITY
provided by smart materials and a breathable construction

HIGHEST DURABILITY
CE APPROVED BY EN 1621-2
with top results for residual forces our vest surpasses the strictest legal standards

MULTILAYER DESIGN
– when worn, the dual density foam adapts to the body contours. Guarantees maximum flexibility and safety.

WASHABLE

our protectors can be washed without any problems

HIGHEST DURABILITY

the innovative combination of various foam layers make our protectors extra strong and durable against external forces

ABSORBS MORE THAN 93% OF THE IMPACT ENERGY

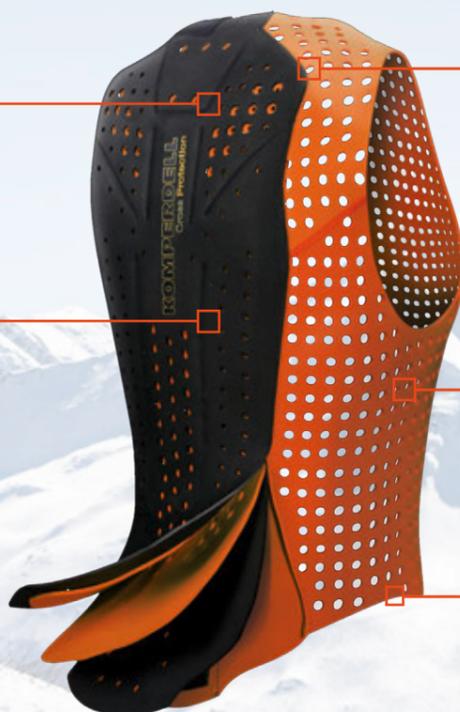

The impact forces are absorbed by a combination of various different layers

THERMO FIT - ADAPTS THROUGH BODY TEMPERATURE

– when worn, the dual density foam adapts to the body contours

MAXIMUM BREATHABILITY

provided by smart materials and a breathable construction

1

SAFETY YOU CAN RELY ON

It is our main philosophy – that our products provide maximum benefit and protection for the user. Although it was not easy to launch a completely new protection system and compete against a familiar hard shell protector – we followed our direction and realized our concepts consistently and uncompromisingly – doing so we become the # 1 manufacturer of body protection in different fields of sport.

2

BEST KNOW-HOW

No other brand has won as many awards as we did. We are # 1 manufacturer of body protection in different fields of sport. For more than 20 years we have gained invaluable know-how on how to best protect our customers. A Komperdell body protector offers a noticeable better wearing comfort – safety without any compromises.

3

HONEST PROTECTION

We offer honest quality and a complete protection from the neck to the tailbone. We want our customers to wear the best and safest protection. Every product bears our name and we take that as a personal commitment. Meeting happy and excited customers means the world to us.

CASUAL PROTECTION

A completely new way of combining protection and comfort.

EVEN BETTER CONCEALED

the new Cross Flex Protector provides comfort and safety without any compromises

CLEVER

integrated into a casual hoody – it's so easy to wear that you hardly feel it

1

CONCEPT

Through many and long conversations with our customers we learned that many customers do not want to wear the protectors as a separate piece but would prefer to have the protective technology smartly integrated into an existing layer. The protector becomes an added benefit to a layer they already wear.

2

FINE TUNING

As the only brand we design, develop and manufacture both our protective technology and our apparel. This unique know-how gives us the opportunity to design both the protector and the garment as one single integrated piece. This makes the protector part of the garment and no longer a separate piece.

3

THE PERFECT PROTECTOR

Our mission has always been to provide the best protection possible. This is our obligation to our customers and something we are not willing to compromise on. Although our new casual protectors with the new Cross Flex System are so light that you almost don't feel them, they still provide the same quality of protection as our athletic protectors.

NEW! CROSS FLEX PROTECTOR

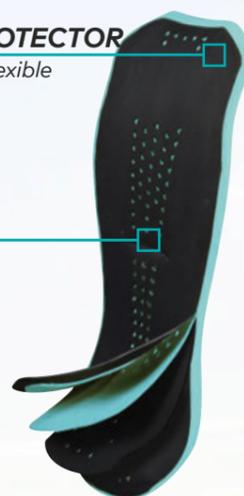

30% lighter and extremely flexible

ABSORBS MORE THAN 93% OF THE IMPACT ENERGY

The impact forces are absorbed by a combination of various different layers.

THERMO FIT - ADAPTS THROUGH BODY TEMPERATURE

– when worn, the dual density foam adapts to the body contours

PROTECTION CASUAL

Protection that's great to wear in a cool new optic.

BIKE PROTECTION

A new style of protection for urban bikers and mountainbikers.

1

THE BEST PROTECTOR

20 years of experience as market leader for motorcycle, wintersports and equestrian protectors give us the know-how and experience to develop a truly unique concept for a bike protector. We are the only brand to develop and manufacture our own protector technology. This gives us the unique opportunity to develop the pack and protector as one cohesive unit.

2

WELL THOUGHT SYSTEM

Whereas protectors are standard in motorcycle and skiing, the concept is relatively new to the bike market although the need for protection is probably greater than in one of the previously mentioned fields. We completely rethought the conventional concept of a bike protector. Instead of integrating a protector plate into an existing backpack, we concentrated all our energy on developing an ergonomically perfect protector and then combine it with a smartly designed pack.

3

UNIQUE PRODUCT

Our Komperdell Protector Pack guarantees best comfort and maximum safety. The protector is soft and flexible because of the dual density foam that adapts to the body contours when worn. We offer safety and protection and a variety of extras e.g. wasser reservoir, storm jacket or raincover. Our protectors are multi impact compliant and washable.
